

Standard Tables

Our Mailroom line of furniture offers our customers a variety of options when it comes to designing their mailroom. We manufacture all products to be functional, durable and stylish, offering our customers a unique line of furniture designed to meet all mailroom requirements.

Standard Tables are one of our more popular products that enable customers to create a smaller mail unit when dealing with a set budget or space restrictions. These value priced tables are available in three sizes and can be outfitted with all modular mailroom components. They are not offered with a storage shelf and / or sliding doors. They have a fixed height of 29" high and can be used for storing documents and / or mailing accessories, sorting and processing mail and are a great workstation for small mailing machines and scales. When designing your mailroom and working with a budget take a look at Dehnco's Standard Tables as a price conscious product that can be used to create a functional mailroom layout in your office. A Standard Table can also be used as a workstation as shown in the photograph above.
