

Locking Sorter Shelves

Our newly designed perforated sorter shelves have unique locking tabs to secure shelves into place. All shelves are adjustable on 1-5/8" increments and are available in one suitable width to fit all sorter sizes. All shelves are designed with a return on the front and back side for added strength and durability. Special cut-outs intended to receive additional dividers have been positioned in the center of each shelf. These cut-outs accommodate letter size envelopes and can double your sorting capacity.

Our **Sorter** Modules are available in a variety of sizes and styles. We carry Closed Back Mail Sorters, Pass Thru Mail Sorters, Vertical Mail Sorters, Security Mail Sorters, Combination Mail Sorters, Wide Opening Mail Sorters and Corner Mail Sorters. All Sorting Modules are free standing and can be configured to meet your specific mail sorting and storage requirements. Make a list of tasks your mailroom will be responsible for when designing your mailroom layout. That list will help you to pick the appropriate mail components to carry out those tasks. Before you know it you will have created a mailroom built specifically around your office needs.

All Mailroom Sorters securely nest together using a unique, steel, 4-sided skirt. The horizontal sorting shelves on all Mailroom Sorters are removable and adjustable in 1 5/8" increments. All shelves are punched with a tab on either side that can be lifted to keep shelf secured in place.

A **Riser** is typically used with a sorter module to raise the sorter above the table or off the floor. Risers allow for additional storage space under the sorter module and allow for easy cleaning. Risers are available in closed back or open back styles. They are available in three heights: 6-inches, 13-inches and 22-inches, but custom sizes are available upon request. All Risers will support up to four large sorting units and can be properly configured to maximize the use of your storage space. Risers are also frequently placed independently on tables and used as raised shelves.

Risers & Sorters
